

Soil and Water Conservation District Cellular Data Service Purchasing Guidance

Updated June 19, 2014

Background

Texas Soil and Water Conservation Districts may use one of two options when purchasing cellular data service.

Option 1 – Local Purchase

Soil and Water Conservation Districts can purchase cellular data services through a local vendor.

Option 2 – Purchase from a State of Texas Contracted Vendor

Soil and Water Conservation Districts can purchase through a State of Texas Contract. The vendors listed below provide Texas state and local government organizations with cellular data services through contracts administered by the Texas Department of Information Resources (DIR). To access state pricing, an SWCD should reference the DIR wireless contracts. The pricing on these contracts is generally more competitive than what would be otherwise available.

Contracts

Verizon Wireless	DIR-SDD-1779	Wireless Voice and Data Products
T-Mobile USA, Inc.	DIR-SDD-1778	Wireless Voice and Data Products
AT&T Mobility National Accounts LLC.	DIR-SDD-1777	Wireless Voice and Data Products
Sprint Solutions, Inc.	DIR-SDD-1780	Wireless Voice and Data Products

Vendor Contact Information

To place an order, check status of an existing order, or get additional information about available wireless services, please contact your wireless vendor directly.
