Texas Well Owner Network San Jacinto Watershed

The Texas Well Owner Network (TWON) program is a free, one-day educational training for Texas residents who depend on household wells for their water needs. TWON is for private well owners who want to become familiar with groundwater resources, septic system maintenance, well maintenance, water quality and water treatment. Private well owners are independently responsible for monitoring the quality of their wells. Essentially, they are the operators of their own water system and are responsible for ensuring that their water is safe.

Bring your well water samples:

Well owners may bring water samples to the training to be screened for nitrate, total dissolved solids (TDS) and fecal coliform bacteria for \$10. Pick up approved sample bags and bottles with instructions at the Montgomery County Extension office, the Lone Star Groundwater Conservation District office or the Nova Biologicals office.

Bring your samples and payment of \$10 to the training on May 22.

Pre-register for the workshop:
