Texas Well Owner Network

The Texas Well Owners Network (TWON) Well Educated program is a free, one-day educational training for Texas residents who depend on household wells for their water needs. TWON is for private well owners who want to become familiar with groundwater resources, septic system maintenance, well maintenance, water quality and water treatment.

Private well owners are independently responsible for monitoring the quality of their wells. Essentially, they are the operators of their own water system and are responsible for ensuring that their drinking water is safe.

Bring your well water samples:

Well owners may bring water samples to the training to be screened for nitrate, total dissolved solids (TDS), arsenic and fecal coliform bacteria for $10. Pick up approved sample bags with instructions at the Haskell, Knox, Throckmorton and Stonewall County Extension offices. Bring your samples and payment of $10 to the training on April 10.

Each participant will receive a *Texas Well Owner Network Owner's Guide to Water Supply Handbook*

Pre-register for the workshop:
