Texas Well Owner Network

Bastrop Bayou Watershed

The Texas Well Owner Network (TWON) program is a free, educational workshop for Texas residents who depend on household wells for their water needs. TWON is for private well owners who want to become familiar with groundwater resources, well maintenance, water quality and water treatment. Private well owners are independently responsible for monitoring the quality of their wells. Essentially, they are the operators of their own water system and are responsible for ensuring that their water is safe.

The Brazoria County Health Department will have a limited number of water sampling kits that can be picked up by those in attendance. The samples should be returned to the Health Dept. at a later date for a bacteria test.
