

## TEXAS STATE SOIL CONSERVATION BOARD

SECOND FLOOR DENMAN BUILDING  
TEMPLE

September 12, 1952

Hon. Jack Ross,  
Secretary of State  
Austin, Texas

Dear Sir:

The Board of Supervisors of the Kaufman-Van Zandt Soil Conservation District No. 407 has requested that the number of that District be changed to the Kaufman-Van Zandt Soil Conservation District No. 505.

The Kaufman portion of this District, which is the larger, is in State Subdivision Number 5, while the Van Zandt County portion is in State Subdivision Number 4.

The Supervisors of the Kaufman-Van Zandt Soil Conservation District having advised the Texas State Soil Conservation Board that this District, from a standpoint of operations, has more in common with Subdivision 5; therefore the change of the Number of the District from 407 to 505 will give it recognition as being in the State Subdivision Five.

This change will have no effect whatsoever, other than on the number previously assigned by the State Soil Conservation Board of Texas.

At a meeting of the Texas State Soil Conservation Board at Fort Stockton, Texas, August 29, 1952 on a motion by Mr. Martin, with unanimous approval of the Board, it was ordered:

"That the request of the Kaufman-Van Zandt Board be granted and that hereafter the District be known as Kaufman-Van Zandt Soil Conservation District No. 505, be it so recorded in the minutes of the Board, and that the Supervisors of the Kaufman-Van Zandt Soil Conservation District be notified of the Board's action. It was further ordered that the Executive Director of the State Soil Conservation Board be instructed to notify the Secretary of State, State of Texas, of the Board's action and to request that a record of such a change be recorded in the files of the Office of the Secretary of State, deleting the original number of 407 previously assigned to the District and adopting the number 505, presently authorized by the Board."

*YOURS VERY TRULY,  
VCM*

I hereby certify that the quotation in the last paragraph of this letter is a true and correct copy from the minutes of the meeting of the Texas State Soil Conservation Board at Fort Stockton, Texas, August 29, 1952, which were read and finally adopted at a meeting of the Board on
