

## Comprehensive RUAA Interview Form

Stream Name: Mid-Pecan Bayou  
Site: MP003

Segment #: 1431

Interviewer's Name: J. Stroebel

Date & Time (include AM or PM): 22 Jun 11 @ 15:15 CDT

Interviewed: ☐ In person ☒ By phone ☐ By mail

☐ No interviews were conducted

If no interviews were conducted, please provide an explanation:

\*Are you willing to respond to a short survey about this stream? ☒ Yes ☐ No

If yes, complete contact information for the interviewee below. Do not collect name or contact information if interviewee is a minor. The contact information portion is not required if the interviewee does not want to provide this information.

Legal name: Debbie Miller

Daytime phone number: 521-239-1703

Mailing address: \_\_\_\_\_

**Interviewee selected because** (e.g., house adjacent to stream; standing by stream, etc.)

TCEQ employee with knowledge from her ALUAA's conducted at the site.

### Questions:

1. Are you familiar with this stream? ☒ Yes ☐ No If yes, how many years? 2 years  
If yes, proceed to #2. If no, stop here and do not conduct an interview.

2. Describe the location(s) of the stream reach that interviewee is familiar with:

Approximately 1.5 mile upstream and downstream of the site MP003.

3. Have the interviewee characterize the stream flow. Since the interviewer may not be familiar with TCEQ's definitions or distinction between the different water bodies, please refer to the definitions listed below when asking the question.

☐ **Ephemeral:** A stream which flows only during or immediately after a rainfall event, and contains no refuge pools capable of sustaining a viable community of aquatic organisms.

☐ **Intermittent:** A stream which has a period of zero flow for at least one week during most years. Where flow records are available, a stream with a 7Q2 flow of less than 0.1 cubic feet per second is considered intermittent. (Channel contains flowing water for only a portion of the year and surface water may be absent at times.)

☐ **Intermittent w/perennial pools:** An intermittent stream which maintains persistent pools even when flow in the stream is less than 0.1 cubic feet per second. (When not flowing, the water may remain in isolated pools.)

☒ **Perennial:** A stream which flows continuously throughout the year. Perennial streams have 7Q2 equal to or greater than 0.1 cubic feet per second.

4. Have you or your family personally used the stream for recreation? ☐ Yes ☒ No  
If yes, proceed to #6. If no, proceed to #5.

5. a. List reasons stream not used.

Do not live in the area.

b. Proceed to #7.

## Comprehensive RUAA Interview Form

Stream Name: Mid Pecan Bayou  
Site: MP003

Segment #: 1431

6. How do you use the stream? When did these uses occur (e.g., year(s); season) and how often (times/year)?  
What location did these uses occur (get specific location and mark on a map)?

<input type="checkbox"/> Swimming	<input type="checkbox"/> Skin Diving	<input type="checkbox"/> Water Skiing	<input type="checkbox"/> Wind surfing	<input type="checkbox"/> Hunting	<input type="checkbox"/> Wading-Adults
<input type="checkbox"/> Tubing	<input type="checkbox"/> Kayaking	<input type="checkbox"/> Rafting	<input type="checkbox"/> Trapping	<input type="checkbox"/> SCUBA diving	
<input type="checkbox"/> Snorkeling	<input type="checkbox"/> Fishing	<input type="checkbox"/> Boating	<input type="checkbox"/> Canoeing	<input type="checkbox"/> Wading-Children

11. Can you recommend someone else we could contact that knows the stream? ☐Yes ☐No  
If yes, list person's contact information:

\_\_\_\_\_

12. Additional comments (from the interviewee or interviewer):

Mrs. Miller has conducted ALUAA's for TCEQ at this site for the past 2 years. On June 3, 2010, she did observe 2 females in their 20's swimming at the site. They stated that they had cleaned up the area and went swimming frequently at the site. On June 8, 2011, she took photographs of a man with 2 children. They were carrying floats and went to the beach area downstream of the crossing. The boy then took off his pants and shirt and proceeded to swim in the stream. No picture was taken of the actual contact recreation. TIAER personnel did not observe any contact recreation at the site at any time during the first RUAA.
