

# Comprehensive RUAA Interview Form

AU01-01

Stream Name: LEONA RIVER Segment #: 2109 Site: LR01A/2109H

Interviewer's Name: ABEL MARTINEZ

Date & Time (include AM or PM): 03 DECEMBER 2012 2:00 PM

Interviewed: ☒ In person ☐ By phone ☐ By mail

☐ No interviews were conducted

If no interviews were conducted, please provide an explanation:

"Are you willing to respond to a short survey about this stream?" ☒ Yes ☐ No

If yes, complete contact information for the interviewee below. Do not collect name or contact information if interviewee is a minor. The contact information portion is not required if the interviewee does not want to provide this information.

Legal name: MR. Kenneth Dudley

Daytime phone number: \_\_\_\_\_

Mailing address: \_\_\_\_\_

Interviewee selected because (e.g., house adjacent to stream, standing by stream, etc.)

AT BERRY RANCH - RANCH MANAGER

## Questions:

1. Are you familiar with this stream? ☒ Yes ☐ No If yes, how many years? 36 YEARS  
If yes, proceed to #2. If no, stop here and do not conduct an interview.

2. Describe the location(s) of the stream reach the interviewee is familiar with:

BERRY RANCH

3. Have the interviewer characterize the stream flow. Since the interviewer may not be familiar with TCEQ's definitions or distinction between the different water bodies, please refer to the definitions listed below when asking this question.

☒ Ephemeral: A stream which flows only during or immediately after a rainfall event, and contains no refuge pools capable of sustaining a viable community of aquatic organisms. NOW BECAUSE OF BATESVILLE

☐ Intermittent: A stream which has a period of zero flow for at least one week during most years. Where flow records are available, a stream with a 7Q2 flow of less than 0.1 cubic feet per second is considered intermittent. (Channel contains flowing water for only a portion of the year and surface water may be absent at times.)

☐ Intermittent w/ perennial pools: An intermittent stream which maintains persistent pools even when flow in the stream is less than 0.1 cubic feet per second. (When not flowing, the water may remain in isolated pools.)

☒ Perennial: A stream which flows continuously throughout the year. Perennial streams have 7Q2 equal to or greater than 0.1 cubic feet per second. HISTORICALLY UNTIL RECENTLY

4. Have you or your family personally used the stream for recreation? ☒ Yes ☒ No  
If yes, proceed to #6. If no, proceed to #5.

5. a. List reasons stream not used

STREAM IS USED FOR HUNTING PURPOSES EVEN THOUGH IT IS DRY. THE 42 AMPS IN BATESVILLE AREA (BASS BROTHERS) PULL SO MUCH WATER OUT OF THE GROUND THAT THERE IS NO WATER FOR THOSE DOWNSTREAM.

b. Proceed to #7.

# Comprehensive RUAA Interview Form

Stream Name: LEONA RIVER

Segment #: 2109

Site: LR014/2/044

6. How do you use the stream? When did these uses occur (e.g., year(s), season) and how often (times/year)? What location did these uses occur (get specific location and mark on a map)?

☐ Swimming ☐ Skin Diving ☐ Water Skiing ☐ Wind surfing ☒ Hunting ☐ Wading-Adults  
☐ Tubing ☐ Kayaking ☐ Rafting ☐ Trapping ☐ SCUBA diving  
☐ Snorkeling ☒ Fishing ☐ Boating ☐ Canoeing ☐ Wading-Children

7. Have you observed others using this stream for recreation? ☒ Yes ☐ No  
 If yes, proceed to #8. If no, proceed to #9.

8. What kinds of uses have you witnessed? When did you witness these uses occurring (e.g., year(s), season) and how often (times/year)? What location did these uses occur (get specific location and mark on a map)?

☐ Swimming ☐ Skin Diving ☐ Water Skiing ☐ Wind surfing ☒ Hunting ☐ Wading-Adults  
☐ Tubing ☐ Kayaking ☐ Rafting ☐ Trapping ☐ SCUBA diving  
☐ Snorkeling ☒ Fishing ☐ Boating ☐ Canoeing ☐ Wading-Children

9. Have you heard about anyone using this stream for recreation? ☒ Yes ☐ No  
 If yes, proceed to #10. If no, conclude the interview.

10. What kind of uses have you heard about? When did you hear that these uses occur (e.g., year(s), season) and how often (times/year)? What location did these uses occur (get specific location and mark on a map)?

☐ Swimming ☐ Skin Diving ☐ Water Skiing ☐ Wind surfing ☒ Hunting ☐ Wading-Adults  
☐ Tubing ☐ Kayaking ☐ Rafting ☐ Trapping ☐ SCUBA diving  
☐ Snorkeling ☒ Fishing ☐ Boating ☐ Canoeing ☐ Wading-Children

11. Can you recommend someone else we could contact that knows the stream? ☐ Yes ☒ No  
 If yes, list person's contact information:

12. Additional comments (from the interviewee or interviewer):

HISTORICALLY, THE LEONA RIVER USED TO FLOW WHEN THE EDWARD'S AQUEDUCT IN SAN ANTONIO REACHED 670' AND WOULD SPILL OVER INTO THE LEONA SPRINGS. SINCE THE BASS BROTHERS & 42 PUMPS PULLING WATER OUT IN BATESVILLE OVER THE LAST FEW YEARS, THERE IS NO WATER FOR THOSE SOUTH OF BATESVILLE.

Interviewee selected because (e.g., house adjacent to stream, standing by stream, etc.)

## Questions:

1. Are you familiar with this stream? ☒ Yes ☐ No If yes, how many years? 21 years  
If yes, proceed to #2. If no, stop here and do not conduct an interview.

2. Describe the location(s) of the stream reach the interviewee is familiar with:

- private property at bridge (RUAA site)

3. Have the interviewer characterize the stream flow. Since the interviewer may not be familiar with TCEQ's definitions or distinction between the different water bodies, please refer to the definitions listed below when asking this question.

☐ Ephemeral: A stream which flows only during or immediately after a rainfall event, and contains no refuge pools capable of sustaining a viable community of aquatic organisms.

☐ Intermittent: A stream which has a period of zero flow for at least one week during most years. Where flow records are available, a stream with a 7Q2 flow of less than 0.1 cubic feet per second is considered intermittent. (Channel contains flowing water for only a portion of the year and surface water may be absent at times.)

☐ Intermittent w/ perennial pools: An intermittent stream which maintains persistent pools even when flow in the stream is less than 0.1 cubic feet per second. (When not flowing, the water may remain in isolated pools.)

☐ Perennial: A stream which flows continuously throughout the year. Perennial streams have 7Q2 equal to or greater than 0.1 cubic feet per second.

4. Have you or your family personally used the stream for recreation? ☒ Yes ☐ No  
If yes, proceed to #6. If no, proceed to #5.

5. a. List reasons stream not used.

b. Proceed to #7.

**Questions:**

1. Are you familiar with this stream? ☒ Yes ☐ No If yes, how many years? 17 years  
If yes, proceed to #2. If no, stop here and do not conduct an interview.

2. Describe the location(s) of the stream reach the interviewee is familiar with:

Baiter Park - Dike

3. Have the interviewer characterize the stream flow. Since the interviewer may not be familiar with TCEQ's definitions or distinction between the different water bodies, please refer to the definitions listed below when asking this question.

- ☐ Ephemeral: A stream which flows only during or immediately after a rainfall event, and contains no refuge pools capable of sustaining a viable community of aquatic organisms.
- ☐ Intermittent: A stream which has a period of zero flow for at least one week during most years. Where flow records are available, a stream with a 7Q2 flow of less than 0.1 cubic feet per second is considered intermittent. (Channel contains flowing water for only a portion of the year and surface water may be absent at times.)
- ☐ Intermittent w/ perennial pools: An intermittent stream which maintains persistent pools even when flow in the stream is less than 0.1 cubic feet per second. (When not flowing, the water may remain in isolated pools.)
- ☐ Perennial: A stream which flows continuously throughout the year. Perennial streams have 7Q2 equal to or greater than 0.1 cubic feet per second.

4. Have you or your family personally used the stream for recreation? ☒ Yes ☐ No  
If yes, proceed to #6. If no, proceed to #5.

**Questions:**

1. Are you familiar with this stream? ☒ Yes ☐ No If yes, how many years? 1975 to Present  
If yes, proceed to #2. If no, stop here and do not conduct an interview.

2. Describe the location(s) of the stream reach the interviewee is familiar with:

Water ~ 5 above & 5 below

3. Have the interviewer characterize the stream flow. Since the interviewer may not be familiar with TCEQ's definitions or distinction between the different water bodies, please refer to the definitions listed below when asking this question.

- ☐ **Ephemeral:** A stream which flows only during or immediately after a rainfall event, and contains no refuge pools capable of sustaining a viable community of aquatic organisms.
- ☐ **Intermittent:** A stream which has a period of zero flow for at least one week during most years. Where flow records are available, a stream with a 7Q2 flow of less than 0.1 cubic feet per second is considered intermittent. (Channel contains flowing water for only a portion of the year and surface water may be absent at times.)
- ☒ **Intermittent w/ perennial pools:** An intermittent stream which maintains persistent pools even when flow in the stream is less than 0.1 cubic feet per second. (When not flowing, the water may remain in isolated pools.)
- ☐ **Perennial:** A stream which flows continuously throughout the year. Perennial streams have 7Q2 equal to or greater than 0.1 cubic feet per second.

4. Have you or your family personally used the stream for recreation? ☐ Yes ☒ No  
If yes, proceed to #6. If no, proceed to #5.

5. a. List reasons stream not used

- b. Proceed to #7

- 12 Additional comments (from the interviewee or interviewer):

Came to Bates in summer of 1984. In summer of 1984 couldn't come to Bates. because of flood and water over bridge. This lasted two days.  
 At the Park from 86 to 90 I would ski, swim, fish and hunt. Remember mud puddles but it would come back.  
 In 2008 there was no water in Leona. That is the way (dry) it is now.

Interviewee selected because (e.g., house adjacent to stream, standing by stream, etc.)

Works in Bates around Leona

**Questions:**

1. Are you familiar with this stream? ☒ Yes ☐ No If yes, how many years? 30 years  
If yes, proceed to #2. If no, stop here and do not conduct an interview.

2. Describe the location(s) of the stream reach the interviewee is familiar with:  
Bates, going South to where bridge goes over Leona R. (3 miles)

3. Have the interviewer characterize the stream flow. Since the interviewer may not be familiar with TCEQ's definitions or distinction between the different water bodies, please refer to the definitions listed below when asking this question.

- ☐ **Ephemeral:** A stream which flows only during or immediately after a rainfall event, and contains no refuge pools capable of sustaining a viable community of aquatic organisms.
- ☐ **Intermittent:** A stream which has a period of zero flow for at least one week during most years. Where flow records are available, a stream with a 7Q2 flow of less than 0.1 cubic feet per second is considered intermittent. (Channel contains flowing water for only a portion of the year and surface water may be absent at times.)
- ☒ **Intermittent w/ perennial pools:** An intermittent stream which maintains persistent pools even when flow in the stream is less than 0.1 cubic feet per second. (When not flowing, the water may remain in isolated pools.)
- ☒ **Perennial:** A stream which flows continuously throughout the year. Perennial streams have 7Q2 equal to or greater than 0.1 cubic feet per second.

4. Have you or your family personally used the stream for recreation? ☐ Yes ☒ No  
If yes, proceed to #6. If no, proceed to #5.

5. a. List reasons stream not used  
Sustained watered horses

b. Proceed to #7.

TPWD Game Warden**Questions:**1. Are you familiar with this stream? ☒ Yes ☐ No If yes, how many years? \_\_\_\_\_

If yes, proceed to #2. If no, stop here and do not conduct an interview.

2. Describe the location(s) of the stream reach that interviewee is familiar with:  
\_\_\_\_\_

3. Have the interviewee characterize the stream flow. Since the interviewer may not be familiar with TCEQ's definitions or distinction between the different water bodies, please refer to the definitions listed below when asking the question.

- ☐ **Ephemeral:** A stream which flows only during or immediately after a rainfall event, and contains no refuge pools capable of sustaining a viable community of aquatic organisms.
- ☒ **Intermittent:** A stream which has a period of zero flow for at least one week during most years. Where flow records are available, a stream with a 7Q2 flow of less than 0.1 cubic feet per second is considered intermittent. (Channel contains flowing water for only a portion of the year and surface water may be absent at times.)
- ☐ **Intermittent w/perennial pools:** An intermittent stream which maintains persistent pools even when flow in the stream is less than 0.1 cubic feet per second. (When not flowing, the water may remain in isolated pools.)
- ☐ **Perennial:** A stream which flows continuously throughout the year. Perennial streams have 7Q2 equal to or greater than 0.1 cubic feet per second.

4. Have you or your family personally used the stream for recreation? ☐ Yes ☒ No  
If yes, proceed to #6. If no, proceed to #5.5. a. List reasons stream not used.  
\_\_\_\_\_

b. Proceed to #7.

Interviewee selected because (e.g., house adjacent to stream; standing by stream, etc.):

Feeding ducks with grandson.

**Questions:**

1. Are you familiar with this stream? ☒ Yes ☐ No If yes, how many years? 10y.  
If yes, proceed to #2. If no, stop here and do not conduct an interview.

2. Describe the location(s) of the stream reach the interviewee is familiar with:

City park

3. Have the interviewer characterize the stream flow. Since the interviewer may not be familiar with TCEQ's definitions or distinction between the different water bodies, please refer to the definitions listed below when asking this question.

- ☐ **Ephemeral:** A stream which flows only during or immediately after a rainfall event, and contains no refuge pools capable of sustaining a viable community of aquatic organisms.
- ☐ **Intermittent:** A stream which has a period of zero flow for at least one week during most years. Where flow records are available, a stream with a 7Q2 flow of less than 0.1 cubic feet per second is considered intermittent. (Channel contains flowing water for only a portion of the year and surface water may be absent at times.)
- ☐ **Intermittent w/ perennial pools:** An intermittent stream which maintains persistent pools even when flow in the stream is less than 0.1 cubic feet per second. (When not flowing, the water may remain in isolated pools.)
- ☐ **Perennial:** A stream which flows continuously throughout the year. Perennial streams have 7Q2 equal to or greater than 0.1 cubic feet per second.

4. Have you or your family personally used the stream for recreation? ☐ Yes ☒ No  
If yes, proceed to #6. If no, proceed to #5.

5. a. List reasons stream not used:

Looks nasty

b. Proceed to #7.

Interviewer's Name: Matt Brown

Date & Time (include AM or PM): 8:30am Jun 11 2012

Interviewed: ☐ In person ☒ By phone ☐ By mail

☐ No interviews were conducted

If no interviews were conducted, please provide an explanation:

\*Are you willing to respond to a short survey about this stream? ☒ Yes ☐ No

If yes, complete contact information for the interviewee below. Do not collect name or contact information if interviewee is a minor. The contact information portion is not required if the interviewee does not want to provide this information.

Legal name: James Dalrymple

Daytime phone number: 830-278-6661

Mailing address: \_\_\_\_\_

Interviewee selected because (e.g., house adjacent to stream; standing by stream, etc.)

Uvalde Co. Extension Agent

**Questions:**

1. Are you familiar with this stream? ☒ Yes ☐ No If yes, how many years? \_\_\_\_\_

If yes, proceed to #2. If no, stop here and do not conduct an interview.

2. Describe the location(s) of the stream reach that interviewee is familiar with:

Uvalde County portion.

3. Have the interviewee characterize the stream flow. Since the interviewer may not be familiar with TCEQ's definitions or distinction between the different water bodies, please refer to the definitions listed below when asking the question.

☐ **Ephemeral:** A stream which flows only during or immediately after a rainfall event, and contains no refuge pools capable of sustaining a viable community of aquatic organisms.

☐ **Intermittent:** A stream which has a period of zero flow for at least one week during most years. Where flow records are available, a stream with a 7Q2 flow of less than 0.1 cubic feet per second is considered intermittent. (Channel contains flowing water for only a portion of the year and surface water may be absent at times.)

☐ **Intermittent w/perennial pools:** An intermittent stream which maintains persistent pools even when flow in the stream is less than 0.1 cubic feet per second. (When not flowing, the water may remain in isolated pools.)

☐ **Perennial:** A stream which flows continuously throughout the year. Perennial streams have 7Q2 equal to or greater than 0.1 cubic feet per second.

4. Have you or your family personally used the stream for recreation? ☒ Yes ☐ No

If yes, proceed to #6. If no, proceed to #5.

5. a. List reasons stream not used.

b. Proceed to #7.

SEE LETTER ATTACHED FROM DOLORES STURIN

July 20, 2012

TO: JEFF STROEBEL, TIAER  
FROM: DOLORES STURM - Uvalde  
SUBJECT: STATUS OF LEONA RIVER

Jeff, I greatly admire and appreciate the work you and your crew are doing regarding the quality analysis of the Leona River. I completed your interview form, but wanted to give you some insight into my personal feelings and the importance of the Leona in our lives and how much pleasure she has given us - not only as recreational. I am emotionally connected to the Leona because many of my childhood and adult memories are associated with this stream.

As a time frame, I was born in December 1931 in Michigan. My grandparents, aunts, uncles and cousins lived in Uvalde, Texas. My Dad's career was an office manager and estimator for a large electrical construction company which built high lines across the United States, so we moved a lot. In the summer months, our parents would let my brother and I spend part of our vacation in Uvalde with our relatives - that is how we became acquainted with the Leona and that is where we learned how to fish and swim at an early age.

With the patient guidance of my grandmother and aunts, we learned how to catch silver side minnows, bait our hooks, catch the fish and clean them. This may seem trivial, but the patience I learned from fishing has carried me through many rough times in my adult life. The Leona not only provided me with recreation of fishing, swimming, camping out, family reunions, etc., but also gave me a place to stay in touch with Mother Earth and meditate. Many of my tears were mingled in with the water of the Leona. For me, she was alive with a soul of her own and she taught me many lessons of life.

Back in those days there was water cress, bamboo and cattails growing along the river's edge. My aunt and uncle had a dairy and although they had water troughs the herd usually drank from the river - in the process, they probably helped pollute the river - as did the deer, coons and other wild life. Then as time went by more land was cleared, crops were planted, fertilizers and insecticides were used and runoff from irrigation, flooded fields and rain flowed into the Leona. Gradually the water cress, bamboo and cattails disappeared.

When my parents retired in 1964, they moved to Uvalde to take care of my Mom's mother who was an avid fisherwoman - as were my parents. Dad had a favorite heavy metal lawn chair for fishing while Mom, her mother and her two sisters would walk the river to their favorite spots for the catch of the day. This was a regular sport and continued for many years - as long as their health allowed. My grandmother died at the age of 99, Dad was 86, Mom 100-1/2 and my aunts in their late 90's.

Four years after my Dad's death, I felt I should be closer to Mom so I moved to Uvalde in 1995 - Mom was 87 and her sisters were still alive. Those were some of the best and happiest years in my life with Mom and her sisters. The four of us continued to fish the Leona and caught strings of bass, sun and Rio Grande perch, crappie, different varieties of catfish and occasionally a turtle or snake.

The Leona is now dry and the river bed is littered with debris and large dead fallen trees. So, this is a sad time for me - I miss the Leona. I am the eternal optimist and I hope and pray she will come back again - new, clean and refreshed. Perhaps she just needed to rest and give us time to contemplate on how and why we should protect our God given resources and not take them for granted. If we continue to abuse Mother Earth, one of these days she is going to regurgitate.

I could write another whole page on the swimming adventures that I, my brother and cousins enjoyed in the Leona during our younger years. Make-shift diving boards, fish nibbling, water fights, skinny dipping and unexpected visitors. On a hot summer day there was no equal to jumping into the cold clear Leona for a swim, coming out refreshed and then feasting on some cold watermelon.

Don't know if this past history will be helpful, but these are my feelings, memories and experiences with the Leona.

Dolores Sturm  
HC-34, Box 1020  
Uvalde, TX 78801

\_\_\_\_\_**Questions:**1. Are you familiar with this stream? ☒ Yes ☐ No If yes, how many years? since 90's

If yes, proceed to #2. If no, stop here and do not conduct an interview.

2. Describe the location(s) of the stream reach that interviewee is familiar with:

Uvalde Area / Ft. Ingce

3. Have the interviewee characterize the stream flow. Since the interviewer may not be familiar with TCEQ's definitions or distinction between the different water bodies, please refer to the definitions listed below when asking the question.

☐ **Ephemeral:** A stream which flows only during or immediately after a rainfall event, and contains no refuge pools capable of sustaining a viable community of aquatic organisms.☐ **Intermittent:** A stream which has a period of zero flow for at least one week during most years. Where flow records are available, a stream with a 7Q2 flow of less than 0.1 cubic feet per second is considered intermittent. (Channel contains flowing water for only a portion of the year and surface water may be absent at times.)☐ **Intermittent w/perennial pools:** An intermittent stream which maintains persistent pools even when flow in the stream is less than 0.1 cubic feet per second. (When not flowing, the water may remain in isolated pools.)☐ **Perennial:** A stream which flows continuously throughout the year. Perennial streams have 7Q2 equal to or greater than 0.1 cubic feet per second.4. Have you or your family personally used the stream for recreation? ☒ Yes ☐ No

If yes, proceed to #6. If no, proceed to #5.

5. a. List reasons stream not used.  
\_\_\_\_\_

b. Proceed to #7.

Frio Co. Extension Service**Questions:**

1. Are you familiar with this stream? ☐ Yes ☐ No If yes, how many years? \_\_\_\_\_  
If yes, proceed to #2. If no, stop here and do not conduct an interview.

2. Describe the location(s) of the stream reach that interviewee is familiar with:  
\_\_\_\_\_

3. Have the interviewee characterize the stream flow. Since the interviewer may not be familiar with TCEQ's definitions or distinction between the different water bodies, please refer to the definitions listed below when asking the question.

- ☐ **Ephemeral:** A stream which flows only during or immediately after a rainfall event, and contains no refuge pools capable of sustaining a viable community of aquatic organisms.
- ☐ **Intermittent:** A stream which has a period of zero flow for at least one week during most years. Where flow records are available, a stream with a 7Q2 flow of less than 0.1 cubic feet per second is considered intermittent. (Channel contains flowing water for only a portion of the year and surface water may be absent at times.)
- ☐ **Intermittent w/perennial pools:** An intermittent stream which maintains persistent pools even when flow in the stream is less than 0.1 cubic feet per second. (When not flowing, the water may remain in isolated pools.)
- ☐ **Perennial:** A stream which flows continuously throughout the year. Perennial streams have 7Q2 equal to or greater than 0.1 cubic feet per second.

4. Have you or your family personally used the stream for recreation? ☐ Yes ☐ No  
If yes, proceed to #6. If no, proceed to #5.

5. a. List reasons stream not used.  
\_\_\_\_\_

- b. Proceed to #7.
